

# DON'T LET THE BED BUGS BITE!

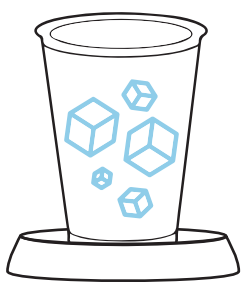

**IDENTIFY**  
Be certain that what you've found is a bed bug.

**1**

## **2** MONITOR

Make a careful visual inspection of the area where bed bugs were seen and use a bed bug trap to determine if you need further treatment measures.

Learn how to build your own bed bug trap to attract and monitor bed bugs.

If a student has bed bugs, also check other schools their siblings attend.

## **3** EDUCATE

Help school officials, teachers, and students know more about bed bugs.

Notify:

Principal

Teacher

Nurse

Scan this code to learn more about bed bugs.

## **4** TREAT

Vacuuming and trapping solves most bed bug introductions. Schools rarely become infested, so pesticides are not recommended in classrooms.

Check out these resources to help with bed bugs in the home environment.
